## Opinion

The 27th world Congress & expo on Dermatology (AESTHETIC MEDICINE 2022) is going to be held during April 13-14, 2022. Through the theme: "Novel Trends in Dermatology and Aesthetic", conference will explore the advances in Dermatology. It will be organized by Conference Series llc LTD. This conference could be an exceptional event that brings along novel and international mixture of giant and medium Dermatologists, leading universities and Dermatology establishments creating the conference an ideal platform to share expertise, foster collaboration across trade and world, and assess rising technologies across the world.

Dermatology is the science that is concerned with the diagnosis and treatment of diseases of the skin, hair and nails. Dermatologists are medical doctors who train in this area for many years, making them the experts in all things related to skin, hair, and nails. The capacity of the skin and its associated conditions to stir up an intrinsic fascination seems limitless. With around 2000 estimated diagnoses, dermatology boasts an unmatched abundance of clinical variety. From the neonate afflicted by a genodermatosis to the elderly patient with skin cancer, the scope of dermatology is broad and tremendously varied, and progression within this

specialty has the potential to significantly enhance all aspects of patient care.

Dermatology Conferences mainly deals with the research on diagnosis and treatment of conditions related to skin, hair, and nails. Dermatologists are doctors who train in this area for many years, making them an expert in all things related to skin, hair, and nails. Disorders of skin, hair, and nails fall within the area of a dermatologist. This specialty is divided broadly into medical and surgical fields, with clinicians in secondary care practicing both. This Dermatology Conference focuses on skin cancer, Psoriasis, all Skin diseases, Acne scar treatment, Allergy symptoms, Psoriasis Treatment, Scalp Psoriasis all other Dermatological diseases, Clinical dermatology and Cosmetic dermatology.

It includes indications related to minimizing signs of aging such as skin laxity, wrinkles, and liver spots. Aesthetic medicine also plays a role in the treatment of excess fat, cellulite and obesity. Laser based therapies can be indicated for the treatment of scars, unwanted hair, skin discoloration, and spider veins.
