

Editorial Note: Journal of Climatology and Weather Forecasting

Jennifer J*

Editorial Office, Journal of Climatology and Weather Forecasting, London, United Kingdom

EDITORIAL

It is a source of pride and joy to announce that during the year 2020, all of the issues of volume 8 were released online ahead of schedule, and the print issues were also printed and distributed within 30 days of the issue being published online. Eminent experts from all across the world have mentioned the articles published in Journal of Climatology & Weather Forecasting 132 times. All of this journal's articles are indexed and abstracted by Index Copernicus, Google Scholar, Publons, World Cat, and a variety of other databases. The impact factor of the journal is 0.96. For quality control in the review process, the journal employs the Editorial Manager System. Editorial Manager is a system for submitting, reviewing, and monitoring manuscripts online. Review processing is handled by members of the Journal of Climatology & Weather Forecasting's editorial board or outside experts; any citable submission must get the approval of at least two independent reviewers, followed by editor approval. Authors can submit manuscripts and watch their progress through the system, with the hope of seeing them published. Reviewers can access manuscripts and provide feedback to the editor. The entire submission/review/revise/publish process can be managed by editors. The success of any scientific magazine is measured by the number of visitors, and the Journal of Climatology & Weather Forecasting continues to attract viewers from all around the world. According to Google Analytics, more

than readers visit our journal websites to submit papers, explore the most recent climate research, and refer to the published content to conceptualise their research study, deduce research hypotheses, write case reports, and validate their contributions.

Readers from all over the world, including the United States, Japan, the United Kingdom, India, Egypt, and Nigeria, visit our journal's website to read about current research in this field. Individual author contributions are promoted, and as a result, the authors have a strong reputation among a global audience. During the calendar year 2019, JCWF received a number of papers, of which 48% were rejected during preliminary screening and 20 % during peer review. Around 32% of papers have been processed and made available online. The journal received review contributions from 50 research scientists from around the world. The journal's Editorial Board has 13 Editors who have actively given their valuable services to the publication of papers throughout the year. I would like to thank the Editor in Chief, Dr. Shoichiro Ozaki, and Dr. Richard Snow for their help in finalising the articles that were published, as well as the editorial assistant, Dr. Alessandro Pezzoli, for helping to get JCWF issues out on time. I would like to thank all of the writers, reviewers, the publisher, the JCWF advisory and editorial boards, and the office bearers for their continued support in bringing out yet another volume of JCWF, and I look forward to their unwavering support in bringing out Volume 8 of JCWF on time.
