### **Abstract**

Mutual category sex can worth to reduce anxiety between them for the path a better future is less painful as losing a human. According to a study, men sometimes act less interested in sex, in order to get it. A recent study has established what women have been wondering for a while now. Men sometimes act less interested in sex, in order to get it, the findings suggest. When heterosexuals have casual sex, previous research same author indicates it is typically the woman who sets the boundaries. If she's not interested, usually nothing will happen. When men and women in the study met, about half of the men said they were interested in having sex with the woman, whereas most women were uninterested initially. So the women in the study basically have little interest in having casual sex at first unless they find the man really attractive and strong. But evidently, a man who gave the impression of wanting to have sex with anyone, anytime, was not what most women were looking for. That could be why men acted way less interested in sex than they really were. Men who are overly eager do not come across as attractive.
