

Journal of Psychological Abnormalities: Acknowledgement to Reviewers

G rard Mercier*

French Association of Psychotherapy, University of Besancon, France

EDITORIAL

On behalf of the editors of the Journal of Psychological Abnormalities (JPAC), I would like to express my sincere gratitude to the reviewers for assessing manuscripts. The editors greatly appreciate the contribution of reviewers who have dedicated their valuable time and efforts in reviewing the assigned manuscripts, which is crucial to the journal's editorial decision-making process. The Journal of Psychological Abnormalities (JPAC) follows single-blind peer-review process, where the identities of the authors are disclosed to reviewers but those of reviewers are not disclosed, to avoid any biases. Committing to review is a diligent task, requiring not only careful reading, analysis, and commentary but also a willingness to continue with a manuscript through multiple revisions. The Journal has taken several steps to thank and acknowledge the reviewers. The Journal has an Editorial submission system that generates a unique id and password for their reviewers, who accept the reviewer invitation. By creating an account on the Editorial submission system, reviewers can submit their comments either on the journal's email id at psychology@journalsci.org or directly on the online submission system. Also, they can access details of their past reviews and can download a letter of acknowledgment for their records. On successfully completing the reviewing of 5 manuscripts, by each reviewer, submitted to the Journal the reviewers are entitled to get an official reviewer certificate from the Editorial team. Feedback from reviewers shows that most of them see their task as voluntary and mostly unseen work in service to the scientific community.

The Journal of Psychological Abnormalities (JPAC) is an international peer-reviewed journal and one of the preferred journal in the field of Psychology and related disorders. The first issue of the journal was published in the year 2012 and since then it is growing

continuously and publishing sufficient number of articles in each issues successfully with active support of the reviewers. The main aim of the journal is to publish high-quality, authentic, relevant and up-to-date research going on in the field of Psychology. Journal of Psychological Abnormalities (JPAC) is an open access that allows online publications of relevant articles in the field of Abnormal Child Psychology, Brain Disorders, Child Abuse, Child Behavioral Psychology, Child Development Psychology, Child Psychology Disorders, Children Psychopathology, Clinical Child Psychology, Experimental Child Psychology, Forensic Child Psychology, Neurodegenerative disease, Neurological disorders, Pediatric Psychology, Pediatric Psychology, Sleep Disorder. The Journal of Psychological Abnormalities (JPAC) is a tri-annual journal and publishes article in English and every article is rigorously peer-reviewed and is published online with 45 days after acceptance. The individuals who are listed below have provided peer-review of manuscript which were submitted to the Journal of Psychological Abnormalities (JPAC). With their consistent support and advice, a total of 8 articles are published from January 2019 to July 2020 from authors belonging to different geographical locations across the world. They receive no remuneration for their work and still took out time from their busy schedules to read and evaluated manuscripts submitted to the Journal of Psychological Abnormalities (JPAC) from December 2019 to July 2020. I and the editorial team thank them for their indispensable work.
