

Market Analysis and Video Presentation-Surgery

Kyle Joseph*

Journal Managing Editor, Surgery: Current Research, Barcelona, Spain

INTRODUCTION

The international surgery market is highly competitive with the presence of numerous large and small vendors with huge market shares. The annual growth rate for the complete surgery market is forecast to be 7% for 2011-2020. The report, titled "Insignificantly Invasive Surgery Market-Global Industry Analysis, Growth, Trends and Forecast, 2013-2019", states that showing a hearty CAGR of 10.50% from 2013 to 2019, the negligibly obtrusive surgery market is foreseen to prolong from an estimation of US\$25 bn in 2012 to US\$50.6 bn in 2019.

Surgical care has a major role in treating a broad spectrum of diseases in humans. It is required at all ages; from neonates with congenital anomalies to the aged with cataracts. Surgery can be done to minimize the growth of cancer and is also used in lowering HIV transmission via circumcision. It places a major role in acute emergency care such as bowel perforations and trauma and also to cure chronic illness such as osteoarthritis.

The Medical Robotics and Computer Assisted Surgery Market is anticipated to gain \$20.5 billion by 2022. It is a technologically advanced surgical, rehabilitation, and assistive solution used mainly during complex surgical procedures, physical complications, and hospital automation, respectively. It is mainly segmented into surgical, non-invasive radiosurgery, rehabilitation and pharmacy automation robots. The surgical robotics system includes surgical arms, surgeons console, and monitoring systems and software. The surgical robotic systems market achieved prominence in the recent years, owing to fast technological advancements, increasing investments in R&D, and its extensive application in critical surgeries such as orthopedic, cardiac, and neurosurgery.

Get Global Networking from your Door Step

Video is a King - To make your presentations more compelling, harness the power of the narrative with video.

Why Virtual/Video Presentation

An expertly delivered video will keep your crowd more engaged a lot with the general substance; it will recount your story and will incite passionate reactions. Video introduction impeccably lines up with your objectives as a moderator: you need a draw in crowd to consider and follow up on the data you're passing on.

It's not difficult to improve the crowd insight through video, which uses sight and sound to pull the crowd in. A short video will give them better thoughts of your vision or approach, and all the more productively, everybody benefits. You will discuss more with less.

Virtual/Video introductions are expanding revenue in furnishing students with real introductions and video is shown to be an extending channel for introduction.

Video introduction is at present utilized by our 2000+ speakers (having VISA issues, plan clashes and so forth...) across the globe.

Video Presentation Opportunity

Unavailability to travel due to various issues such as time constraint and visa to enter the country. Video Presentation is one best option to put across your research at a global platform. Having video played at the conference proceedings, would surely serve the purpose of online visibility for your research.

- No Travel Plan & Agreements
- No Visa Issues
- No Appointment to be cancelled
- No Break from the regular schedule

Benefits of opting Video Presentation

- Speaker video presentation will be officially recognized
- One of the scientific committee will represent the presentation on behalf of speaker
- Session Chair suggestions and comments will be communicated after the conference
- Publication of Abstract in the Souvenir and International Journal with unique DOI
- Certification by the International Organizing Committee (IOCM)
- Conference Souvenir (Hardcopy) delivery to presenter address

Details for Video Presenter

Record your presentation video and send us through www.wetransfer.com

Duration of the video: 35 - 40 minutes

Registration Fee: \$399

Submission of Abstract with Biography to respective conference Program Manager or submission through direct online website. Upon submitting the abstract, you would receive an acknowledgment of acceptance from the respective Program Manager within 24 hours.

Simply Record your Presentation through Camera/Phone with high clarity and send the same to conference Program Manager which will be presented at the conference venue on Speaker name and will also be available in website along with other presentations

for the conference.

Well there are many advantages! It was fun, interesting and kept the audience engaged. Of course they had a budget and invested money into their presentation. They will come back and said it was well worth the investment in the end and they use it for many other uses.

In this regards, we take the immense pleasure to invite you all to be the speaker under Video Presentation category at “International Conference on Surgery and Anesthesia” during June 13-14, 2022 in Vancouver, Canada. Certification would be received by video presenters along with external scientific association with decision makers and leaders around the globe.
