

## Market Analysis on World No Diabetes 2020

Marcos Roberto Tovani Palone

LONGDOM proffers our immense pleasure and honour in extending you a warm invitation to attend [World NO Diabetes and Obesity Congress](#) on [March 23-24, 2020](#) in [London, UK](#). It is focusing on '*Commitment to Excellence in the Field of Diabetes and Obesity*' to enhance and explore knowledge among the Medical community and to establish corporations and exchanging ideas. Providing the right stage to present stimulating Keynote talks, Plenary sessions, Discussion Panels, B2B Meetings, Poster symposia, Video Presentations and Workshops.

After the successful completion of the [Diabetes 2020](#) Longdom Conferences, we are pleased to welcome you to the "[Annual Summit on Diabetes and Endocrinology](#)." The congress is scheduled to take place on [March 23-24, 2020](#) in the beautiful city of [London, UK](#). This 2020 Diabetes and obesity Conference will give you exemplary experience and great insights in the field of research.

According to this research report, the global market for [Diabetes and Obesity](#) is projected to show a robust growth of 6.5 per cent in the CAGR during 2019-2024.

Type I diabetes happens when resistant framework obliterates cells in pancreas called beta cells. They make insulin. Harm to beta cells from Type I diabetes distracts the procedure. Glucose doesn't move into our cells since insulin isn't there to do it. Rather it develops in blood and cells starve. This causes high glucose, which leads to:

- Dehydration.
- Loss of weight
- Damage to your eyes, kidneys, and heart.

Type II diabetes, the most widely

recognized sort of diabetes, is a sickness that happens when our blood glucose is excessively high. Blood glucose is your fundamental wellspring of vitality and comes for the most part from the nourishment you eat. Insulin, a hormone made by the pancreas, enables glucose to get into your cells to be utilized for vitality. In type II diabetes, body doesn't make enough insulin or doesn't utilize insulin well. An excessive amount of glucose at that point remains in your blood, and insufficient achieves your cells.

Call for proposals are open for oral papers, panel presentations and scientific posters across the list of tracks highlighted in our website and papers on other topics not listed are also welcome if they meet the objectives of the conference. We hope and expect Diabetes & Endocrinology 2020 theme to inspire a number of research avenues, and look forward to discussing ideas, findings and synergies, in this International Academic Forum.

Growing incidences of endocrine disorders such as hyperthyroidism and adrenal insufficiency is predicted to boost the demand for endocrine testing. The growing diabetic, geriatric and obese population worldwide is expected to promote the market growth. Furthermore, growing healthcare awareness among individuals coupled with increasing government support is expected to increase the diagnosis at an early, thereby contributing to the growth of the endocrine testing market.

In 2018, the global market for Endocrinology was 67 million US\$ and is expected to reach 86 million US\$ by the end of 2025, with a CAGR of 10 per cent between 2019 and 2025.
