

Special Issue-Manuscript Submission Date Extended

Julie J*

Editorial Office, Climatology & Weather Forecasting, Belgium

ANNOUNCEMENT

As announced in the previous issue that Journal of Climatology & Weather Forecasting is going to release special issue on the topic "Trends of Climate Change". The objective of this special issue is to circulate the updates about rapid climate changing sequels, the causes and reasons, parameters affecting climate change, different regions affected primarily due the sudden climatic variations and the consequences. Under the scope of special issue, the journal invites the researchers to share their research expertise and opinion. We would like to request the authors to come up with the latest articles discussing about the above-mentioned topic.

This is an honour for our journal that Dr. Abdullah- Al- Fahad, Ph.D., NASA Goddard Space Flight Centre, is the executive editor for this special issue. He was graduated with Ph.D. in climate

Dynamics from George Mason University. His current research at NASA includes climate model development, high resolution climate modelling, and annual to decadal climate prediction.

Hereby we would like to inform that the manuscript submission (for special issue) date has been extended to July 25, 2021. They can submit their manuscripts for special issue online through journal website: Online Submission System.

This is prideful to share that we are now releasing monthly issues and working on journal upgradation. The journal has also submitted the application for major indexing sites as well. We appeal the eminent researchers to register their updated ideas/research in the scope of "Trends of Climate Change" or articles for the regular issues and give us your valuable contribution.
